Corporate Care Management

COMPANY OVERVIEW

Corporate Care Management (CCM) is a private woman owned company that has been providing case management and wellness services for self-funded health, workers' compensation, and disability plans for over thirty years.

A. Health Plan Services Working for the employer, or their designated third party administrator, CCM assists health insurance plan members to obtain cost effective, quality medical care consistent with the employer's health benefit plan. CCM's nurse case managers advocate for the health plan members and their family as they navigate the confusing medical system. Services include Pre-admission Review, Concurrent Utilization Review, Case Management, Care Coordination, Retrospective Claim Review, and Appeals. The Return on investment (ROI) for CCM Health Services business for 2015 was 4.1 to 1*.

B. Comprehensive Wellness/Population Health Management- CCM features a nationally accredited comprehensive wellness program which reaches the right member with the right messages at the right time. This program can be offered with CCM's health plan services or as standalone employer benefit. CCM's wellness program encourages early cancer detection and supports the delivery of nationally recognized standards of care. CCM analyzes medical claims data to detect employer population health care trends and member specific gaps in health care. CCM provides actionable information to members through yearlong messaging campaigns and nurse outreach. Return on Investment for clients using Health Services and Comprehensive Wellness for 2015 was 6.0 to 1*.

C. Absence Management – CCM provides case management for both workers' compensation & disability insurance plans. CCM nurse case managers expedite testing and treatment with the goal to achieve maximum medical improvement as quickly as possible. Nurse case managers then facilitate employees return to work with a keen eye on any physical limitations to avoid re-injury. Expedited return to work reduces indemnity costs and minimizes the need for temporary labor. CCM also provides assistance to HR and Labor Relations when medical issues are presented that may impact an employee's performance. Return on Investment (ROI) for the CCM book of business in 2015 was 6.2 to 1*.

PAST PERFORMANCE

CCM's results are measurable with savings and ROI reported at the employer level. CCM currently serves over 95 self-funded plans, several of which have been with CCM for over 20 years. CCM currently provides health plan and comprehensive wellness services to multiple New York State counties, cities, school districts, welfare funds, TPAs and carriers. Absence management services clients include municipalities and utilities. References available upon request.

DIFFERENTIATORS

- CCM is an independent company allowing us to work with any TPA, carrier or employer.
- CCM branded or client branded programs options are available.
- Many of our services can be allocated and paid directly from the member's insurance claim file
- CCM's Health Case Management and Comprehensive Wellness programs are Nationally Accredited by URAC.
- Many of CCM Nurses are Certified Case Manager, Chronic Care Specialist and hold licenses in multiple states including NY, PA, NJ, CT, MA, UT and others as requested.

*Past performance does not guarantee future results.
